[Slave Revolt on Screen](#) May 30 2022 In [Slave Revolt on Screen: The Haitian Revolution in Film and Video Games](#) author Alyssa Goldstein Sepinwall analyzes how films and video games from around the world have depicted slave revolt, focusing on the Haitian Revolution (1791–1804). This event, the first successful revolution by enslaved people in modern history, sent shock waves throughout the Atlantic World. Regardless of its historical significance however, this revolution has become less well-known—and appears less often on screen—than most other revolutions; its story, involving enslaved Africans liberating themselves through violence, does not match the suffering-slaves-waiting-for-a-white-hero genre that pervades Hollywood treatments of Black history. Despite Hollywood’s near-silence on this event, some films on the Revolution do exist—from directors in Haiti, the US, France, and elsewhere. [Slave Revolt on Screen](#) offers the first-ever comprehensive analysis of Haitian Revolution cinema, including completed films and planned projects that were never made. In addition to studying cinema, this book also breaks ground in examining video games, a pop-culture form long neglected by historians. Sepinwall scrutinizes video game depictions of Haitian slave revolt that appear in games like the [Assassin’s Creed](#) series that have reached millions more players than comparable films. In analyzing films and games on the revolution, [Slave Revolt on Screen](#) calls attention to the ways that economic legacies of slavery and colonialism warp pop-culture portrayals of the past and leave audiences with distorted understandings.

[Proctology Treasure](#) Apr 16 2021 Dr. Simon Glover is thrown into the public eye when he wins the National Lottery. In a cruel twist of fate, though, he is shortly thereafter diagnosed with terminal cancer. Having no living relatives, he decides to have a treasure hunt and bequeath his money to the patient from his proctology practice that is able to decipher his clues and find the treasure. Villainous forces, however, are at work, as they frequently are when tens of millions of dollars are involved. It seems everyone wants to get their hands on the booty. Dr. Glover's clues lead us on a humorous adventure through Arizona and Hawaii, in search of [Proctology Treasure](#). [The Color of Our Shame](#) Nov 11 2020 For many Americans, the election of Barack Obama as the country's first black president signaled that we had become a post-racial nation - some even suggested that race was no longer worth discussing. Of course, the evidence tells a very different story. And while social scientists are fully engaged in examining the facts of race, normative political thought has failed to grapple with race as an interesting moral case or as a focus in the expansive theory of social justice. Political thought's under participation in the debate over the status of blacks in American society raises serious concerns since the main academic task of political theory is to adjudicate discrepancies between the demands of ideal justice and social realities. Christopher J. Lebron contends that it is the duty of political thought to address the moral problems that attend racial inequality and to make those problems salient to a democratic polity. Thus, in [The Color of Our Shame](#), he asks two major questions. First, given the success of the Civil Rights Act and the sharp decline in overt racist norms, how can we explain the persistence of systemic racial inequality? Second, once we have settled on an explanation, what might political philosophy have to offer in terms of a solution? In order to answer these questions Lebron suggests that we reconceive of racial inequality as a condition that marks the normative status of black citizens in the eyes of the nation. He argues that our collective response to racial inequality ought to be shame. While we reject race as a reason for marginalizing blacks on the basis of liberal democratic ideals, we fail to live up to those ideals - a situation that Lebron sees as a failure of national character. Drawing on a wide array of resources including liberal theory, virtue ethics, history, and popular culture, Lebron proposes a move toward a "perfectionist politics" that would compel a higher level of racially relevant moral excellence from individuals and institutions and enable America to meet the democratic ideals that it has set for itself.

[Be the Change](#) Jul 08 2020 "Have you ever witnessed or experienced something and thought, "This isn't right! Someone needs to do something about it!"? This is exactly how advocacy begins. Even if you've never considered yourself an advocate, advocacy is for everyone. If you have ever signed a petition to show your support for a cause, or spoken out about something you felt people should better understand- that's advocacy! Advocacy can take many forms-from voting in an election, to raising awareness, to organizing a campaign for change-or leading an entire movement. It happens at multiple levels, from local to global. It's democracy in action"--

[Research Directions in Distributed Parameter Systems](#) Oct 30 2019 Eleven chapters, written by experts in their respective fields, on topics ranging from control of the Navier-Stokes equations to nondestructive evaluation - all of which are modeled by distributed parameter systems.

["A" Force](#) Sep 09 2020 June 1940. The Italians declared war on the British. Completely unprepared for war, the British had only 35,000 troops to defend Egypt. Opposing them, the Italian army in Libya numbered at least 215,000; in East Africa, the Italians could muster another 200,000 men against a meager 19,000 British and commonwealth troops positioned in the Sudan and East Africa. Out-numbered and unlikely to receive sizable reinforcements of men or desperately needed supplies, it is surprising that the British survived. But they did. How? They got creative. Under the leadership of General Archibald P. Wavell, the commander-in-chief of the Middle East, the British set out to greatly exaggerate the size of their forces, supply levels, and state of battle readiness. When their deceitful charades proved successful, Wavell turned trickery into a profession and created an entirely new agency dedicated to carrying out deception. “A” Force: The Origins of British Military Deception during the Second World War looks at how and why the British first employed deception in WWII. More specifically, it traces the development of the "A" Force organization - the first British organization to practice both tactical and strategic deception in the field. Formed in Cairo in 1941, "A" Force was headed by an unconventional colonel named Dudley Wrangel Clarke. Because there was no precedent for Clarke's "A" Force, it truly functioned on a trial-and-error basis. The learning curve was steep, but Clarke was up for the challenge. By the Battle of El Alamein, British deception had reach maturity. Moreover, it was there that the deceptionists established the deception blueprint later used by the London planners used to plan and execute Operation Bodyguard, the campaign to conceal Allied intentions regarding the well-known D-day landing at Normandy. In contrast to earlier deception histories that have tended to focus on Britain’s later deception coups (Bodyguard), thus giving the impression that London masterminded Britain’s deception efforts, this work clearly shows that British deception was forged much earlier in the deserts of Africa under the leadership of Dudley Clarke, not London. Moreover, it was born not out of opportunity, but out of sheer desperation. A” Force explores an area of deception history that has often been neglected. While older studies and documentaries focused on the D-day deception campaign and Britain’s infamous double-agents, this work explores the origins of Britain’s deception activities to reveal how the British became such masterful deceivers.

[Discovering the American Past: A Look at the Evidence, Volume II: Since 1865](#) Nov 04 2022 This primary source reader in the popular DISCOVERING series contains a six-part pedagogical framework that guides students through the process of historical inquiry and explanation. The text emphasizes historical study as interpretation rather than memorization of data. Each chapter is organized around the same pedagogical framework: The Problem, Background, The Method, The Evidence, Questions to Consider, and Epilogue.

Volume II of the Eighth Edition integrates new documents and revised coverage throughout. For example, there are new chapters on the controversial decision to flood the Hetch Hetchy Valley in Yosemite in the early twentieth century, and the rise of the religious right in the late twentieth century. Encountering China Sep 02 2022 Welsh Baptist missionary to China Timothy Richard (1845-1919) was once widely regarded as "one of the greatest missionaries whom any branch of the Church, whether Roman Catholic, Russian Orthodox, or Protestant, has sent to China." Today, few have heard of Richard and his remarkable lifetime of ministry in China. As the first critical examination of Richard's missionary identity, this groundbreaking historical study traces the narrative of Richard's early life in Wales and his formative first two decades of service in China. Richard's adaptations to the common evangelistic techniques of his day, his interest in learning from grassroots Chinese sectarian religions, his integration of evangelism and famine relief during the North China Famine (1876-79), his strategic decision to evangelize Chinese elites, and his complicated relationships with Hudson Taylor and other China missionaries are all explored through the writings and personal letters of Richard and his contemporaries. The resulting portrait represents a significant revision to existing interpretations of this influential China missionary, emphasizing his deep empathy for the people of China and his abiding evangelical identity. Readable and relevant, *Encountering China* provides a new generation with an introduction to this lost legend of China mission.

The Royal Marsden Manual of Cancer Nursing Procedures Aug 09 2020 The Royal Marsden is the world's first hospital dedicated to cancer diagnosis, treatment, research and education – a centre of excellence with an international reputation for ground-breaking research and pioneering the very latest in cancer treatments and technologies, as well as specialising in cancer diagnosis and education. This companion volume to the internationally successful *The Royal Marsden Manual of Clinical Nursing Procedures* is designed to support practitioners who work specifically with oncology patients by providing detailed evidence-based procedures and rationale, and problem-solving guidance on all aspects of oncology nursing. *The Royal Marsden Manual of Cancer Nursing Procedures*: Is organized and structured to represent the needs of the patient along their care pathway Provides the latest evidence underpinning all procedures Includes information on haematological procedures; pain assessment and management; wound care; oncological emergencies; and end-of-life care Gives detailed guidelines on supporting patients living with cancer with practical information on such things as benefits, exercise and nutrition. *The Royal Marsden Manual of Cancer Nursing Procedures* is an invaluable, definitive resource for all those involved in the provision of cancer care and support to patients and their families.

Writing Routes Aug 01 2022 The use of creative writing as a route to personal or professional development is a powerful therapeutic tool, yet the most difficult part is knowing how and where to begin. This collection of short pieces introduce and demonstrate many different ways of getting into and thinking about creative writing for personal or professional development.

New Optimization Techniques in Engineering May 18 2021 Presently, general-purpose optimization techniques such as Simulated Annealing, and Genetic Algorithms, have become standard optimization techniques. Concerted research efforts have been made recently in order to invent novel optimization techniques for solving real life problems, which have the attributes of memory update and population-based search solutions. The book describes a variety of these novel optimization techniques which in most cases outperform the standard optimization techniques in many application areas. *New Optimization Techniques in Engineering* reports applications and results of the novel optimization techniques considering a multitude of practical problems in the different engineering disciplines – presenting both the background of the subject area and the techniques for solving the problems.

Inventory and Production Management in Supply Chains Mar 16 2021 Authored by a team of experts, the new edition of this bestseller presents practical techniques for managing inventory and production throughout supply chains. It covers the current context of inventory and production management, replenishment systems for managing individual inventories within a firm, managing inventory in multiple locations and firms, and production management. The book presents sophisticated concepts and solutions with an eye towards today's economy of global demand, cost-saving, and rapid cycles. It explains how to decrease working capital and how to deal with coordinating chains across boundaries.

The Positive Function of Evil Oct 23 2021 This collection explores the controversial and perhaps even abject idea that evils, large and small, human and natural, may have a central positive function to play in our lives. For centuries a concern of religious thinkers from the Christian tradition, very little systematic work has been done to explore this idea from the secular point of view.

The Handbook of Community Practice Mar 28 2022 *The Handbook of Community Practice* is the first volume in this field, encompassing community development, organizing, planning, and social change, and the first community practice text that provides in-depth treatment of globalization-including its impact on communities in the United States and in international development work. The Handbook is grounded in participatory and empowerment practice including social change, social and economic development, feminist practice, community-collaboratives, and engagement in diverse communities. It utilizes the social development perspective and employs analyses of persistent poverty, policy practice, and community research approaches as well as providing strategies for advocacy and social and legislative action. The Handbook consists of thirty-six chapters, which challenge readers to examine and update assess practice, theory, and research methods. As it expands on models and approaches, delineates emerging issues, and connects policy and practice, the book provides vision and strategies for community practice in the coming decades. The associate editors are eminent scholars in the field, and chapter authors are leaders in their various community practice arenas.

Justice to Future Generations and the Environment Jul 28 2019 This book contributes to the discussion about obligations to future generations by arguing that a principle of justice, according to which we must share the environmental resources of the planet with future generations, must be considered to be part of the just basic structure of society. The argument is based on a close study of Rawls' theory of justice and particularly of its treatment of the future generations issue. But the author claims that the affirmation of a principle of justice towards future generations must be accompanied by the attempt to articulate the motives that shape a concern with the fate of future persons in the first place. In order to consider, and further, its real chances, we must put the perspective of justice between generations, with its very detached character, within the context of our view from the present such as it is situated in historical time. This opens a fascinating but difficult field of inquiry about inter-generational value and its different aspects. Although it is centred on the theory of justice and on general ethics, the book also pays attention to the legal issues raised by the notion of a future-oriented just basic structure of society.

Paranoia Dec 13 2020 Luigi Zoja presents an insightful analysis of the use and misuse of paranoia throughout history and in contemporary society. Zoja combines history with depth psychology, contemporary politics and tragic literature, resulting in a clear and balanced analysis presented with rare clarity. The devastating impact of paranoia on societies is explored in detail. Focusing on the contagious aspects of paranoia and its infectious, self-replicating dynamics, Zoja takes such diverse examples as Ajax and George W. Bush, Cain and the American Holocaust, Hitler, Stalin and Othello to illustrate his argument. He reconstructs the emblematic arguments that paranoia has promoted in Western history and examines how the power of the modern media and mass communication has affected how it spreads. Paranoia clearly examines how leaders lose control of their influence, how the collective unconscious acquires an autonomous life and how seductive its effects can be – more so than any political, religious or ideological discourse. This gripping study will be essential reading for depth and analytical psychologists, and academics and students of history, cultural studies, psychology, classical studies, literary studies, anthropology and sociology.

The ghost story 1840–1920 Jun 18 2021 *The ghost story 1840-1920: A cultural history* examines the British ghost story within the political contexts of the long nineteenth century. By relating the ghost story to economic, national, colonial and gendered contexts' it provides a critical re-evaluation of the period. The conjuring of a political discourse of spectrality during the nineteenth century enables a culturally sensitive reconsideration of the work of writers including Dickens, Collins, Charlotte Riddell, Vernon Lee, May Sinclair, Kipling, Le Fanu, Henry James and M.R. James. Additionally, a chapter on the interpretation of spirit messages reveals how issues relating to textual analysis were implicated within a language of the spectral. This book is the first full-length study of the British ghost story in over 30 years and it will be of interest to academics, graduate students and advanced undergraduates working on the Gothic, literary studies, historical studies, critical theory and cultural studies.

Sarah Anna Glover Aug 21 2021 In *Sarah Anna Glover: Nineteenth Century Music Education Pioneer*, Jane Southcott explores the life and pedagogy of Sarah Anna Glover, the female music education pioneer of congregational singing (psalmody) and singing in nineteenth-century schools. Glover devoted her life to the creation and propagation of a way of teaching class music that was meticulously devised, musically rigorous, and successfully promulgated. Southcott analyzes Glover's methods, history, and memory, and works to correct inaccuracies and misrepresentations that have emerged since Glover's death.

Leadership and Learning Mar 04 2020 This proposal is for a book about pedagogical leadership that draws upon an extensive literature base as well as empirical research by the author in order to examine forms of leadership and management that promote and instill education for learning and social justice. Its starting points are to restore and elevate social and moral purpose in leadership as first-order constructs that have theoretical and practical implications for existing and potential leader educators. This is not necessarily an easy thing to do. Asking educators and researchers of education leadership to define what they consider to be the core moral values underpinning leadership in educational settings usually results in some fairly bland, if fundamentally important statements about putting learners at the heart of leadership praxis, especially that which occurs in educational settings. In practice, numerous organisational mission statements attest to this rhetorical conviction. Yet, it is current policy contexts that place relations between leaders, teachers, and learners in contradictory 'moral' positions. Drives to improve student performance through increased competition in the market-place, intensified procedures for monitoring and evaluation, and frenetic commitments to 'change' as overarching leadership mantras have relegated Sergiovanni's (1998) definition of pedagogical leadership 'that invests in capacity building by developing social and academic capital for students and intellectual capital for teachers' as second, even third order constructs. This book intends to reverse the process and in doing so, it will relegate to second order, and by lively debate and illustrative vignettes, many, though not all of the hegemonic constructs that are prevalent in current 'managerial' times. This book will therefore define and challenge a paradox; as governments express commitment to an educational settlement that minimises exclusion, widens participation, and promotes 'active' citizenship, the much heralded vanguards of that settlement - leaders and managers - are being enjoined to reduce their thinking and action to technicist 'manoeuvres' (Grace, 2000:236) in which aspirations towards social justice can become more distant, strangely exotic even in their expression. As importantly, such technical manoeuvring is not accompanied by a reduction in leadership and management tasks and responsibilities. As more is demanded of organizations and their leaders in terms of responsibilities for learning in areas of health, sexuality, drug awareness, physical exercise and nutrition, citizenship, work experience, race equality, and skills in familial and social caring, questions arise about the extent to which 'social justice' constitutes a wide umbrella under which such interests might 'shelter' or whether social justice is to be considered 'separately' with attendant dangers to be seen as add-on and therefore potentially marginalized or distinct from the total enterprise that constitutes education and learning.

Architecture and Nationalism in Sri Lanka Feb 12 2021 The role of the home, the domestic sphere and the intimate, ethno-cultural identities that are cultivated within it, are critical to understanding the polemical constructions of country and city; tradition and modernity; and regionalism and cosmopolitanism. The home is fundamental to ideas of the homeland that give nationalism its imaginative form and its political trajectory. This book explores positions that are vital to ideas of national belonging through the history of colonial, bourgeois self-fashioning and post colonial identity construction in Sri Lanka. The country remains central to related architectural discourses due to its emergence as a critical site for regional architecture, post-independence. Suggesting patterns of indigenous accommodation and resistance that are expressed through built form, the book argues that the nation grows as an extension of an indigenous private sphere, ostensibly uncontaminated by colonial influences, domesticating institutions and appropriating rural geographies in the pursuit of its hegemonic ideals. This ambitious, comprehensive, wide-ranging book presents an abundance of new and original material and many imaginative insights into the history of architecture and nationalism from the mid nineteenth century to the present day.

Far Off Metal River Sep 21 2021 Drawing on Samuel Hearne's gruesome account of an alleged massacre at Bloody Falls in 1771, Emilie Cameron reveals how Qablunaat (non-Inuit, non-Indigenous people) have used stories about the Arctic for over two centuries as a tool to justify ongoing colonization and economic exploitation of the North. Rather than expecting Inuit to counter these narratives with their own stories about their homeland, Cameron argues that it is the responsibility of Qablunaat to develop new relationships with northerners – ones grounded in the political, cultural, economic, environmental, and social landscapes of the contemporary Arctic.

Integer Programming Apr 04 2020 Integer Programming: Theory, Applications, and Computations provides information pertinent to the theory, applications, and computations of integer programming. This book presents the computational advantages of the various techniques of integer programming. Organized into eight chapters, this book begins with an overview of the general categorization of integer applications and explains the three fundamental techniques of integer programming. This text then explores the concept of implicit enumeration, which is general in a sense that it is applicable to any well-defined binary program. Other chapters consider the branch-and-bound methods, the cutting-plane method, and its closely related asymptotic problem. This book discusses as well several specialized algorithms for certain well-known integer models and provides an alternative approach to the solution of the integer problem. The final chapter deals with a number of observations about the formulations and executions of integer programming models. This book is a valuable resource for industrial engineers and research workers.

Managing Finance and Resources in Education Oct 11 2020 `The book provides an excellent wide and stimulating set of readings and would be useful to anyone taking forward Unit 3 or the Accelerated Route of SQH' - SQH Newsletter `This is a useful addition to the literature on finance and resource management in education.... Those whose work involves managing resources and finance in schools and colleges will find this a useful or even indispensable addition to their bookshelves, whether they are heads, principals or middle managers' - Mentoring and Tutoring This book will provide readers with knowledge and understanding of the theory and practice of managing finance, resources and stakeholders in schools and colleges. Written specifically for those studying for an academic qualification at Masters level in educational management, it provides self-study material and links to other key texts in the field. The authors deal with the links between finance, resources and stakeholders in the context of school and college self-management. Examples are drawn from international settings as well as from the United Kingdom. Building on an examination of theoretical perspectives, practical considerations and applications are examined in a format which encourages the reader to explore the context of their own educational institution. This book is a core text for the University of Leicester MBA in Educational Management.

Amazons, Savages, and Machiavels Feb 01 2020 A broad-based and accessible anthology of travel and colonial writing in the English Renaissance, selected to represent the world-picture of sixteenth- and seventeenth-century readers in England. It includes not just the narratives of discovery of the New World but also accounts of cultures already well known through trade links, such as Turkey and the Moluccan islands, and of places that featured just as significantly in the early modern English imagination: from Ireland to Russia and the Far East, from Calais to India and Africa, from France and Italy to the West Indies. The writings reveal painstaking attempts to understand the 'other' as well as ignorance and prejudice, surprising connections alongside phobic reactions to difference, the desire to co-operate alongside the desire to extinguish and exploit. The second edition of Amazons, Savages, and Machiavels is significantly revised and expanded, twenty years after the first edition helped to establish the field of travel and colonial writing in English. The anthology includes substantial new chapters of extracts on 'The North', detailing the important Arctic voyages and search for the elusive North-West Passage; 'Islamic West Asia and the Eastern Mediterranean', includes new material on Persia, Russia, and Jerusalem; 'England from Elsewhere' includes observations of England and the English from European travellers; and the epilogue on women travellers, explores the importance in particular of Lady Catherine Whetenhall's journey to Italy, recorded after her early death. The chapter on Africa includes new material on the Congo, Gambia, and Sierra Leone, and the chapter on East Asia and the South Seas contains new material on China and Japan. There are new images of West African figures and Sir Anthony and Lady Shirley in Persian courtly attire. The introduction has been carefully revised to take into account the wealth of scholarship on English perceptions of Asia and the Mediterranean, and the analysis of race and racial identity has been expanded in line with contemporary concerns. Headnotes and notes have been revised and expanded throughout the text. The anthology is the most comprehensive single-volume available in English, and, with its newly modernized text and reader-friendly apparatus, is designed to appeal to the general as well as the specialist reader. It is essential reading for anyone interested in the history of travel, colonial writing, and racial politics at the time of the first British Empire.
