Teaching and Learning Mathematics Online Nov 12 2020 Online education has become a major component of higher education worldwide. In mathematics and statistics courses, there exists a number of challenges that are unique to the teaching and learning of mathematics and statistics in an online environment. These challenges are deeply connected to already existing difficulties related to math anxiety, conceptual understanding of mathematical ideas, communicating mathematically, and the appropriate use of technology. Teaching and Learning Mathematics Online bridges these issues by presenting meaningful and practical solutions for teaching mathematics and statistics online. It focuses on the problems observed by mathematics instructors currently working in the field who strive to hone their craft and share best practices with our professional community. The book provides a set of

standard practices, improving the quality of online teaching and the learning of mathematics. Instructors will benefit from learning new techniques and approaches to delivering content. Features Based on the experiences of working educators in the field Assimilates the latest technology developments for interactive distance education Focuses on mathematical education for developing early mathematics courses

Community Building in the Online Classroom Apr 05 2020 This book offers theories, principles, and strategies for developing the online classroom as a deep and full learning community that students feel is truly about, by, and for them. To be immediately useful, it offers practical ideas for helping students to actively contribute to shaping classroom affairs toward relevance and meaning. However, in order to elevate the discussion beyond the “primer” level, the book anchors those ideas in social and educational principles and theories. As social learning theories posit, deep and full learning occurs when our full cognitive, emotional, and social selves are engaged. This book mitigates the challenges to such engagement in the virtual classroom, arguing that a strong sense of community ownership will enhance students’ ability to successfully master content. Although not all strategies are group based, the use of groups both large and small is a primary way of helping online students to become active on their own behalf in building a learning community that meets their needs. Strategies outlined here focus primarily on promoting shared authority, visibility, and voice and on encouraging student disclosure of needs and peer connection.

The Supportive Learning Environment Mar 29 2022 This entry in the James H. Stronge Research-to-Practice Series focuses on the characteristics of teachers who create supportive learning environments for their students. By conveying a sense of immediacy, credibility, and caring, they communicate to students in both verbal and nonverbal ways that are essential to cultivating a positive and productive learning community. In this book, Stronge, Grant, and Hindman provide a comprehensive overview of the qualities of a supportive teacher. They offer a bridge between research-based theories and practical classroom applications, with templates, planning forms, and other reproducibles. The authors help teachers move toward establishing a learning environment that contributes to effective instructional practices. Topics include: engaging students and their families, effective communication, student ownership of the learning environment, and much more.

Handbook of Research on Strategic Management of Interaction, Presence, and Participation in Online Courses Oct 12 2020 Online learning has become a prominent and inseparable component of higher education in recent years. Questions related to course structure, levels of interaction, presence, and participation within online courses persist and invite further inquiry for determining factors that encourage effective teaching and learning in online environments. The Handbook of Research on Strategic Management of Interaction, Presence, and Participation in Online Courses explores models of course development and delivery techniques to improve instruction, learning, and student satisfaction in online courses. Covering topics such as rates of participation, student engagement and retention, and social development, this handbook serves as a resource for educators in online learning environments, as well as for course designers and developers of online courses and researchers whose agenda includes examining interaction, presence, and participation in online courses.

Reppin' Dec 14 2020 From hip-hop artists in the Marshall Islands to innovative multimedia producers in Vanuatu to racial justice writers in Utah, Pacific Islander youth are using radical expression to transform their communities. Exploring multiple perspectives about Pacific Islander youth cultures in such locations as Aotearoa New Zealand, Australia, Hawai‘i, and Tonga, this cross-disciplinary volume foregrounds social justice methodologies and programs that confront the ongoing legacies of colonization, incarceration, and militarization. The ten essays in this collection also highlight the ways in which youth throughout Oceania and the diaspora have embraced digital technologies to communicate across national boundaries, mobilize sites of political resistance, and remix popular media. By centering Indigenous peoples’ creativity and self-determination, Reppin’ vividly illuminates the dynamic power of Pacific Islander youth to reshape the present and future of settler cities and other urban spaces in Oceania and beyond.

School, Family, and Community Partnerships Jul 01 2022 School, Family, and Community Partnerships: Preparing Educators and Improving Schools addresses a fundamental question in education today: How will colleges and universities prepare future teachers, administrators, counselors, and other education professionals to conduct effective programs of family and community involvement that contribute to students' success in school? The work of Joyce L. Epstein has advanced theories, research, policies, and practices of family and community involvement in elementary, middle, and high schools, districts, and states nationwide. In this second edition, she shows that there are new and better ways to organize programs of family and community involvement as essential components of district leadership and school improvement. THE SECOND EDITION OFFERS EDUCATORS AND RESEARCHERS: A framework for helping rising educators to develop comprehensive, goal-linked programs of school, family, and community partnerships. A clear discussion of the theory of overlapping spheres of influence, which asserts that schools, families, and communities share responsibility for student success in school. A historic overview and exploration of research on the nature and effects of parent involvement. Methods for applying the theory, framework, and research on partnerships in college course assignments, class discussions, projects and activities, and field experiences. Examples that show how research-based approaches improve policies on partnerships, district leadership, and school programs of family and community involvement. Definitive and engaging, School, Family, and Community Partnerships can be used as a main or supplementary text in courses on foundations of education methods of teaching, educational administration, family and community relations, contemporary issues in education, sociology of education, sociology of the family, school psychology, social work, education policy, and other courses that prepare professionals to work in schools and with families and students.

Foundations of Education Research Jul 09 2020 Now in its second edition, Foundations of Education Research defines, discusses, and offers applications for the central components of educational research, providing both novice and experienced researchers with a common ground from which to work. Fully updated throughout, the second edition adds a glossary of terms, additional examples, and includes a discussion of similarities and differences in education research. Eight concise, accessible chapters cover conceptual framework, epistemology, paradigm, theory, theoretical framework, and methodology/method. This unique primer demystifies jargon and makes the theoretical components of research accessible, giving students the tools they need to understand existing education research literature and to produce theoretically-grounded work of their own. Each chapter begins with perspectives from both novice and experienced researchers, whose guiding questions assist researchers engaging with theory for the first time and those looking to improve their understanding of the fundamentals. Practice exercises, examples, and suggested reading lists at the end of each chapter offer students resources they can apply to their own research and thinking in concrete ways. A perfect accompaniment to standard research courses, this book is designed to help students achieve a deeper understanding of what is expected of them and ideas about how to achieve it.

Promising Practices for Family Engagement in Out-of-School Time Aug 22 2021 This concise monograph addresses the expanding field of family involvement to out of school time (OST). OST may be defined as time outside of state required time limits for compulsory school attendance but time in which students are engaged in planned academic or enrichment activities. During the past decade, OST programs have burgeoned across the United States. OST programs are offered to children and youth, elementary through high school, as structured and safe venues to increase student academic achievement, and extend students' interests. Chapter authors share promising practices from a range of backgrounds, including nonprofit organizations, faith-based, health, and governmental agencies as well as university-school connections. Contents describe the benefits and concerns of parent engagement in OST, such as student outcomes of parent engagement in OST, how parents select appropriate programs, ways to connect with parents to assure regular attendance of youth, methods to solicit families to participate in OST activities, and evaluation measures.

The Case Against Homework Sep 22 2021 Does assigning fifty math problems accomplish any more than assigning five? Is memorizing word lists the best way to increase vocabulary—especially when it takes away from reading time? And what is the real purpose behind those devilish dioramas? The time our children spend doing homework has skyrocketed in recent years. Parents spend countless hours cajoling their kids to complete such assignments—often without considering whether or not they serve any worthwhile purpose. Even many teachers are in the dark: Only one of the hundreds the authors interviewed and surveyed had ever taken a course specifically on homework during training. The truth, according to Sara Bennett and Nancy Kalish, is that there is almost no evidence that homework helps elementary school students achieve academic success and little evidence that it helps older students. Yet the nightly burden is taking a serious toll on America's families. It robs children of the sleep, play, and exercise time they need for proper physical, emotional, and neurological development. And it is a hidden cause of the childhood obesity epidemic, creating a nation of "homework potatoes." In *The Case Against Homework*, Bennett and Kalish draw on academic research, interviews with educators, parents, and kids, and their own experience as parents and successful homework reformers to offer detailed advice to frustrated parents. You'll find out which assignments advance learning and which are time-wasters, how to set priorities when your child comes home with an overstuffed backpack, how to talk and write to teachers and school administrators in persuasive, nonconfrontational ways, and how to rally other parents to help restore balance in your children's lives. Empowering, practical, and rigorously researched, *The Case Against Homework* shows how too much work is having a negative effect on our children's achievement and development and gives us the tools and tactics we need to advocate for change. Also available as an eBook
