BIAN Edition 2019 – A framework for the financial services industry Dec 30 2019 The Banking Industry Architecture Network (BIAN) is a global, not-for profit association of banks, solution providers, consultancy companies, integrators and academic partners with the shared aim of defining a semantic standard for the banking industry covering almost all the well-known architectural layers. The BIAN was formed in 2008 by a group of banks and solution providers with the shared aim of defining a semantic Service Operation standard for the financial services industry. At a later stage other standards bodies, like ISO and IFX, joined

along with some academic partners. BIAN's expectation is that a standard definition of business functions and service interactions that describe the general construct of any bank will be of significant benefit to the industry. When compared to an increasing number of proprietary designs, a dedicated industry standard, like BIAN, provides the following main benefits: • It enables the more efficient and effective development and integration of software solutions for and between banks; • It significantly lowers the overall integration costs; • It improves the operational efficiency within and between banks and provides the opportunity for greater solution and capability re-use within and among banks; • It supports the current need for more industry integration and collaboration through the usage of (open) APIs; • It supports the adoption of more flexible business service sourcing models and enhances the evolution and adoption of shared third party business services; • It supports FinTechs and RegTechs to gain an easy insight in the complex financial services industry structure. This book is intended for those enterprise, business and solution architects in the financial services industry (FSI) who are interested in applying the BIAN Industry Standard in their organization. It will provide readers with in-depth knowledge to help them understand the full construct of BIAN artifacts, how to apply them and how they can contribute to help the BIAN standard fulfill their (organization's) needs. The authors of the book expect the readers to have an in-depth knowledge of IT architectural principles and methodologies.

Plunkett's Automobile Industry Almanac 2009 Oct 27 2019 The automobile industry is evolving rapidly on a worldwide basis. Manufacturers are merging, component design and manufacture are now frequently outsourced instead of being created in-house, brands are changing and the giant auto makers are expanding deeper into providing financial services to car buyers. The skyrocketing price of gas spurs developments in hybrid technology and clean diesel, as manufacturers look for ways to improve fuel efficiency. Meanwhile, all of the biggest, most successful firms have become totally global in nature. Plunkett's Automobile Industry Almanac will be your complete guide to this immense, fascinating industry. On the car dealership side, giant, nationwide holding companies have acquired the best dealers in major markets. Even the used car business is being taken over by national chains. E-commerce is having profound effects on the car industry. Consumers use the Internet to become better informed before making a purchase. Online sites like Autobytel steer millions of car buyers toward specific dealers while the same sites deliver competing bids for cars, insurance and financing in a manner that lowers costs and improves

satisfaction among consumers. Meanwhile, auto makers are using the latest in e-commerce methods to manage their supply chains and replenish their inventories. This exciting new book (which includes a database on CD-ROM) is a complete reference tool for everything you need to know about the car, truck and specialty vehicles business, including: Automotive industry trends and market research; Mergers, acquisitions, globalization; Automobile manufacturers; Truck makers; Makers of specialty vehicles such as RVs; Automobile loans, insurance and other financial services; Dealerships; Components manufacturers; Retail auto parts stores; E-commerce ; and much, much more. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. This book also includes statistical tables, an automobile industry glossary, industry contacts and thorough indexes. The corporate profile section of the book includes our proprietary, in-depth profiles of the 400 leading companies in all facets of the automobile industry. Purchasers may also receive a free copy of the company profiles database on CD-ROM.

The Inventory Toolkit May 27 2022 Looking beyond the complexity and theory of inventory management, authors Geoff Relph and Catherine Milner examine managing inventory and achieving targets. Whilst the first edition mainly focused on planning, this new edition of The Inventory Toolkit includes three new chapters that go beyond planning to implementation. Amongst other topics, the new chapters cover holding and moving inventory, working with suppliers and

using stock and flow to identify pinch points and facilitate lean and agile operations. This comprehensive second edition of The Inventory Toolkit includes case studies from diverse industries such as retail and aerospace, and worked examples and regular exercises which illustrate how the inventory tools can be used in an operational setting. It is an invaluable reference guide for students and practitioners focusing on inventory management and operations management in manufacturing and retail, as well as operational staff involved in the implementation of the MRP and inventory management modules of ERP systems.

RETAIL INVENTORY MANAGEMENT Mar 13 2021 All organizations hold stocks. These are the stores of materials they keep until needed. A shop, for example, buys goods from a wholesaler and keeps them into stock till it sells them to customers; a farmer stores hay to feed his animals over the winter; a research company has a stock of information; a bank holds cash for its day-to-day transactions. Whenever an organization has materials that it does not use immediately, it puts them into stock. You might imagine stock as warehouses full of goods but every organization holds stock, even those providing the most intangible service. A retail company stores faces the same problems of inventory management as a giant manufacturer with its stores of finished goods and components. This is a book about Retail Inventory Management. It describes recent thinking about retail stock and methods for its control. We have concentrated on the core questions of retail inventory management in this book What exactly is inventory management in retail? How do decisions about stock affect sales in retail operations? How can we control stocks and overall cost? What information do we need? What is the effect of new methods and technology? The answers to these questions embrace the most important issues of inventory management.

Colloidal Ceramic Processing of Nano-, Micro-, and Macro-Particulate Systems Sep 30 2022 Colloidal processing has always been a major processing method. It facilitates control of particle interactions through a wide variety of schemes, which include surface coating, dispersion additives, and solvent control, among others. Controlling particle interactions also permits better resultant rheology and controlled green microstructures via a wide range of forming methods. In recent years, the particle size involved has been broadened into both the nanometer and the larger than micrometer ranges. This book covers fundamental issues encountered in colloidal processing nano-(less than 0.1 micron), micro-(from 0.1 to 5 micron) and macro-(larger than 5 micron) particulate systems and at the same time explore applications for these developments. Proceedings of the symposium held at the 105th Annual Meeting of The American Ceramic Society, April 27-30, in Nashville, Tennessee; Ceramic Transactions, Volume 152.

Good Agricultural Practices for Greenhouse Vegetable Crops Sep 06 2020 This publication capitalizes on the experience of scientists from the North Africa and Near East countries, in collaboration with experts from around the world, specialized in the different aspects of greenhouse crop production. It provides a comprehensive description and assessment of the greenhouse production practices in use in Mediterranean climate areas that have helped diversify vegetable production and increase productivity. The publication is also meant to be used as a reference and tool for trainers and growers as well as other actors in the greenhouse vegetables value chain in this region.

Systems biology and ecology of microbial mat communities Mar 25 2022 Microbial mat communities consist of dense populations of microorganisms embedded in exopolymers and/or biomineralized solid phases, and are often found in mm-cm thick assemblages, which can be stratified due to environmental gradients such as light, oxygen or sulfide. Microbial mat communities are commonly observed under extreme environmental conditions, deriving energy primarily from light and/or reduced chemicals to drive autotrophic fixation of carbon dioxide. Microbial mat ecosystems are regarded as living analogues of primordial systems on Earth, and they often form perennial structures with conspicuous stratifications of microbial populations that can be studied in situ under stable conditions for many years. Consequently, microbial mat communities are ideal natural laboratories and represent excellent model systems for studying microbial community structure and function, microbial dynamics and interactions, and discovery of new microorganisms with novel metabolic pathways potentially useful in future industrial and/or medical applications. Due to their relative simplicity and organization, microbial mat communities are often excellent testing grounds for new technologies in microbiology including micro-sensor analysis, stable isotope methodology and modern genomics. Integrative studies of microbial mat communities that combine modern biogeochemical and molecular biological methods with traditional microbiology, macro-ecological approaches, and community network modeling will provide new and detailed insights regarding the systems biology of microbial mats and the complex interplay among individual populations and their physicochemical environment. These processes ultimately control the biogeochemical cycling of energy and/or nutrients in microbial systems. Similarities in microbial community function across different types of communities from highly disparate environments may provide a deeper basis for understanding microbial community dynamics and the ecological role of specific microbial populations. Approaches and concepts developed in highly-constrained, relatively stable natural communities may also provide insights useful for studying and understanding more complex microbial communities.

Collaborative Modeling and Decision-Making for Complex Energy Systems Dec 10 2020 This volume provides the fundamentals of involving stakeholders in collaborative modeling of energy systems, including the technical subsystem as well as its economic, social, environmental and political subsystems. It presents a Stakeholder-Assisted Modeling and Policy Design (SAM-PD) framework that can be applied by energy system developers, managers and decision makers to involve a wide range of stakeholders in group model-building on a larger scale. By illustrating the capabilities of the SAM-PD framework, the book introduces an actual case study of the Cape Wind Offshore Wind Energy project. This case study details the process by which the author brought together a large number of stakeholders to jointly model the Cape Wind energy system and its broader implications for the regional energy picture and the regional economy and environment. It also offers the most recent in-depth analysis of the Cape Wind project. Contents: Systems Analysis The Role of Expert Analysis in Complex Systems Decisions Systems Representation and Decision-Making Stakeholder-Assisted Modeling and Policy Design The Cape Wind Offshore Wind Energy Project Stakeholder-Assisted Modeling of Cape Wind Learning from Cape Wind Readership: Students, researchers in System Engineering, Energy Studies and Public Policy. Keywords: Engineering Systems; Stakeholders Involvement; Stakeholder-Assisted Modeling and Policy Design (SAM-PD); Cape Wind; Energy System Key Features: This is a unique volume that combines a rich theoretical framework for involving stakeholders in engineering decision-making with an actual in-depth case study The presented frameworks are highly innovative and easy to implement in current decision-making processes
