Practice Perfect Nov 04 2022 Rules for developing talent with disciplined, deliberate, intelligent practice We live in a competition loving culture. We love the performance, the big win, the ticking seconds of the clock as the game comes down to the wire. We watch games and cheer, sometimes to the point of obsession, but if we really wanted to see greatness—wanted to cheer for it, see it happen, understand what made it happen—we'd spend our time watching, obsessing on, and maybe even cheering the practices instead. This book puts practice on the front burner of all who seek to instill talent and achievement in others as well as in themselves. This is a journey to understand that practice, not games, makes champions. In this book, the authors engage the dream of better, both in fields and endeavors where participants know they should practice and also in those where many do not yet recognize the transformative power of practice. MIMED Forum IV Jul 08 2020 This book is the outcome of one of the Forum Series on Architectural Education, organized by the Architectural Education Association of Turkey (MIMED) on the theme of "Flexibility in Architecture." At Forum IV, the architectural education platform was cross-examined, new ideas and experiences were shared, and the potentials of "regeneration" were discovered. The notion of flexibility in architectural education is the subject of fresh and vital debate which is based on whether it is achieved by the inner dynamics of architecture, or the external dynamics. However, this debate seems null and void since the dynamics of both sides seem to necessitate flexibility in architectural education at almost the same level. Hence the attitude that the prerequisite for creating flexibility according to the inner dynamics of architecture depends on the protection of architectural education from the coercive effects of external dynamics is no longer a relevant issue. Furthermore, architectural education as a role model in such a debate becomes more important, not only in a monotyping global context, but also in the local social context as well. Herein lies a fundamental dichotomy arising from the fact that because of globalization curricula may face the risk of becoming uniform. Any effort to overcome this dichotomy in such a debate seems vital. Then, the question arises whether such a dichotomy, which turns architectural education from an autonomous discipline into a quasi-autonomous one, transforms architectural education into a rather political issue. If the autonomous nature of architectural education resists globalization, the question of the manner in which this resistance occurs and what impact it will have on architectural education seems of the utmost importance. The volume begins with a preface by Gulsun Saglamer, President of MIMED. Contributors include Juhani Pallasmaa, Kim Dovey, Kojin Karatani, Herman Neuckermans, Conall Ó Catháin, Mark Olweny, Ugur Tanyeli, Ferhan Yurekli, Gulsun Saglamer, Fatma Erkok, Rengin Unver, Cigdem Polatoglu, S. The Skillfulness of Virtue Dec 25 2021 The Skillfulness of Virtue provides a new framework for understanding virtue as a skill, based on psychological research on self-regulation and expertise. Matt Stichter lays the foundations of his argument by bringing together theories of self-regulation and skill acquisition, which he then uses as grounds to discuss virtue development as a process of skill acquisition. This account of virtue as skill has important implications for debates about virtue in both virtue ethics and virtue epistemology. Furthermore, it engages seriously with criticisms of virtue theory that arise in moral psychology, as psychological experiments reveal that there are many obstacles to acting and thinking well, even for those with the best of intentions. Stichter draws on self-regulation strategies and examples of deliberate practice in skill acquisition to show how we can overcome some of these obstacles, and become more skillful in our moral and epistemic virtues.

Mindfulness Skills for Trauma and PTSD: Practices for Recovery and Resilience Aug 09 2020 How mindfulness can help trauma survivors move to places of healing. Trauma touches every life, but the way that we hold our pain makes a difference. Mindfulness Skills for Trauma and PTSD provides user-friendly descriptions of the many facets of traumatic stress alongside evidence-based strategies to manage trauma symptoms and build new strengths. This book is a valuable resource for trauma survivors, health professionals, researchers, mindfulness practitioners, and others seeking new pathways to recovery and resilience. It is normal to feel anxious or depressed after trauma, and to have upsetting thoughts and memories. Instead of fighting our feelings and blaming ourselves for what are actually common responses to trauma, mindfulness practices can help us tolerate and decrease distress, cultivate kindness towards ourselves and others, make wise choices, navigate attention, improve relationships, and relax—capacities that reduce trauma symptoms and advance our overall well-being. Practicing the small stuff can help us with the big stuff. As we learn to notice our breathing, walking, minor frustrations or daily activities with curiosity and care, we build inner resources to skillfully handle past trauma, as well as current and future challenges. Mindfulness practices can transform self-blame into self-respect and self-compassion. We can also match specific mindfulness skills to particular trauma symptoms. For example, "grounding" with the five senses can help us when we feel overwhelmed or spaced out, and loving-kindness meditation can alleviate self-criticism. With this book, you will explore scientifically supported mindfulness

practices, plus “In their own words” sections that illustrate the skills with personal stories demonstrating how mindfulness practices have helped others recover from trauma. “Research highlight” sections showcase fascinating scientific studies that form the basis for the book's approaches. As we practice effective strategies to handle a full range of experiences, we can each find new sources of hope, connection, and peace.
