[The Art and Science of Learning Languages](#) May 06 2020 Offers a framework for learning any language and provides the arguments as to why anyone should do so, as well as examining the merits of various methods of language learning. The key message of the book is the importance of self-reliance based on a positive approach and efficient organization.

[Present and Future Trends in TEFL](#) Aug 21 2021 The aim of this book is to develop a framework for describing the field as it currently exists together with well-established views. As far as possible the book describes rather than prescribes, to avoid taking up any single approach or theory regarding what constitutes the legitimate approach to TEFL research. Of course, the personal views of the authors will colour the account provided as it is impossible to separate description from interpretation. Thus, in a way, this book involves the theories, beliefs, knowledge, methods and practices of foreign language teachers and how these can enhance teacher education. This book is planned for pre-service or in-service teachers of a foreign language at primary, secondary or tertiary levels, although the criterions examined are useful to teachers of English as a foreign language, teacher trainers, or modern language teachers involved in teaching any language whether in Spain or overseas. Our main purpose is to help readers to help themselves. Accordingly, the reader is encouraged to be engaged in an examination of foreign language teaching and learning in hope of improving his/her practice and making language teaching more controllable, more interesting and more effective. The chapters are organized into four sections. In Section 1, three chapters describe some perspectives in teacher education. In the first chapter, José M. Vez focuses on the hypothesis that the key to producing well-qualified EFL teachers is to greatly strengthen their professional learning across the continuum of a career in the foreign language classroom. He emphasizes the fact that foreign-language teaching must become a learning profession in order to prompt greater learning among foreign language students and describes the innovative aspects of foreign language teacher education. In the second chapter, Sheena Davies provides an overview of language teacher education today, with particular reference to English language teaching, discusses some current issues associated with the field, and gives notice of her experience working with both native speaker and non-native speaker teachers of English from all over the world on a variety of in-service and pre-service courses and seminars. In chapter 3, we examine the perspectives on teacher thinking and teachers' beliefs in general, and about language learning in particular. .

[Diagnosing Foreign Language Proficiency](#) Jul 08 2020 This book addresses the need for tests that can diagnose the strengths and weaknesses in learners' developing foreign language proficiency. It presents the rationale for, and research surrounding, the development of DIALANG, a suite of internet-delivered diagnostic foreign language tests funded by the European Commission. The word 'diagnosis' is common in discussions in language education and applied linguistics, but very few truly diagnostic tests exist. However, the diagnosis of foreign language proficiency is central to helping learners make progress. This volume explores the nature of diagnostic testing, emphasizing the need for a better understanding of the nature of appropriate diagnosis. The book starts with a debate about how diagnostic testing might most appropriately be developed. Charles Alderson argues that the field has neglected to construct diagnostic tests, partly because other forms of testing have dominated the field. Alderson examines how proficiency has been diagnosed in the key areas of language: reading, listening, writing, grammar and vocabulary. The value of self-assessment is discussed and exemplified as a key component in developing learners', and teachers', awareness of the complexity of language learning. The book ends with a consideration of and recommendations for future developments in the diagnosis of foreign language proficiency.

An Investigation Into the Comparability of Two Tests of English as a Foreign Language Apr 28 2022 This book documents a major study comparing the Cambridge First Certificate in English (FCE) with the Test of English as a Foreign Language (TOEFL) to investigate similarities in test content, candidature and use. While both tests were designed to measure many of the same abilities, they represent radically different approaches to language test development, reflecting deeper differences between educational measurement traditions in the US and UK. The thorough investigation of the fundamental characteristics and operational utility of two of the most widely used English tests for foreign students makes this study a valuable contribution to language testing research. As such, it will be of considerable interest to language testing specialists and examination boards, as well as to academic researchers and graduate students in the field of language assessment more generally.

[The Routledge Handbook of Second Language Acquisition and Language Testing](#) Feb 12 2021 This Handbook, with 45 chapters written by the world's leading scholars in second language acquisition (SLA) and language testing, dives into the important interface between SLA and language testing: shared ground where researchers seek to measure second language performance to better understand how people learn their second languages. The Handbook also reviews how to best measure and evaluate the second language (L2) learners' personal characteristics, backgrounds, and learning contexts to better understand their L2 learning trajectories. Taking a transdisciplinary approach to research, the book builds upon recent theorizing and measurement principles from the fields of applied linguistics, cognitive science, psychology, psycholinguistics, psychometrics, educational measurement, and social psychology. The Handbook is divided into six key sections: (1) Assessment concepts for SLA researchers, (2) Building instruments for SLA research, (3) Measuring individual differences, (4) Measuring language development, (5) Testing specific populations, and (6) Measurement principles for SLA researchers.

[Examining Writing](#) Dec 01 2019 Test developers need to provide a clear explication of the language ability constructs that underpin the tests they offer in the public domain; such an explication is essential for supporting claims about the validity - or usefulness - of test scores. This volume describes the theory and practice of Cambridge ESOL's approach to assessing second language writing ability. A comprehensive test validation framework is used to examine the tasks in Cambridge ESOL writing tests from a number of different validity perspectives that reflect the socio-cognitive nature of any assessment event. The authors show how an understanding and analysis of the framework and its components can assist test developers to operationalise their tests more effectively, especially in relation to the key criteria that differentiate one proficiency level from another. The book provides: an up-to-date review of relevant literature on assessing writing, an accessible and systematic description of the different proficiency levels in second language writing, a comprehensive and coherent basis for validating tests of writing. This volume is a rich source of information on all aspects of examining writing ability. As such, it will be of considerable interest to examination boards who wish to validate their own writing tests in a systematic and coherent manner, as well as to academic researchers and students in the field of language assessment more generally. Measuring Oral Proficiency Through Paired-task Performance Oct 11 2020 This book intends to provide a theoretical overview of examining candidates' oral abilities in different examination formats. In particular, it explores specific partner effects on discourse outcomes and proficiency ratings in the framework of paired-task performance. Two investigations, both set in the context of a proposed Hungarian school leaving examination in English, were carried out in order to contribute to a better understanding of the assumed impact of the chosen variables. Study One investigates discourse differences between examiner-to-examinee interaction and peer-to-peer interaction. Study Two explores the impact of the peer partner's proficiency. The results show that partner effects related to this variable cannot be predicted as either harmful or beneficial since no statistically significant difference was found between 30 candidates' scores in different examination conditions.

Exploring Language Assessment and Testing Jun 18 2021 Routledge Introductions to Applied Linguistics is a series of introductory level textbooks covering the core topics in Applied Linguistics, primarily designed for those beginning postgraduate studies, or taking an introductory MA course as well as advanced undergraduates. Assessing Listening for Chinese English Learners Dec 13 2020 This book reports in detail the newly developed Communicative Listening Comprehension Test (CLCT) for the National College English Test (CET) of China. Following the principles of communicative testing in general and test construction approach proposed by Bachman and Palmer (1996) in particular, the project develops CLCT for CET-4 and CET-6. The research begins with the construction of frameworks of listening task characteristics and communicative listening ability. Subsequently, based on a survey of Chinese college students' English listening needs and an analysis of listening tasks in influential English listening course books and public tests, CLCT-4 and CLCT-6 test specifications are developed. Finally, sample papers are produced and a series of posteriori studies are conducted to examine the difficulty and usefulness of the newly developed notes-completion task type in two CLCT tests. As an example of successful integration of communicative testing theories and test construction practice, this research provides valuable insights into listening test development for other large-scale tests.

Assessing Languages for Specific Purposes May 18 2021 Testing language for specific purposes (LSP) refers to that branch of language testing in which the test content and test methods are derived from an analysis of a specific language use situation, such as Spanish for business, Japanese for tour guides, Italian for language teachers, or English for air traffic control. LSP tests are usually contrasted with general purpose language tests, in which purpose is more broadly defined, as in the Test of English as a Foreign Language. This book is the first to examine the issues surrounding the implementation of tests for specific purposes. It includes an in-depth discussion of the issues, an examination of the current exams, and a comprehensive overview of the literature. Examining Speaking Jun 30 2022 Test developers need to provide a clear explication of the language ability constructs that underpin the tests they offer in the public domain; such an explication is essential for supporting claims about the validity --- or usefulness --- of tests and test scores. This edited volume develops a theoretical framework for validating tests of second language speaking ability. The framework is then applied through an examination of the tasks in Cambridge ESOL speaking tests from a number of different validity perspectives that reflect the socio-cognitive nature of any assessment event. The chapter authors show how an understanding and analysis of the framework and its components can assist test developers to operationalise their tests more effectively, especially in relation to the key criteria that differentiate one proficiency level from another. The volume is a rich source of information on all aspects of examining speaking ability. As such, it will be of considerable interest to examination boards who wish to validate their own speaking tests in a systematic and coherent manner, as well as to academic researchers and graduate students in the field of language assessment more generally. Languages and the Internationalisation of Higher Education Sep 29 2019 This volume offers an overview of the context of internationalisation in which plurilingualism becomes a strategic axis for universities and in which university language centres serve as the key instrument to implement this process. It focuses on three key areas in which language centres are working together with governments across Europe, namely: language policy and internationalisation; specific training for the university community; and language testing and accreditation. The contributors to this book are all policy makers, instructors or evaluators from university language centres involved in the internationalisation of their institutions through languages. They teach and evaluate not only 'regular' students, but students with very specific needs, such as lecturers delivering content courses in English, students in mobility programmes or administrative staff in contact with international students. The book also includes the presentation of the first national higher education language policy in Europe, developed by the Language Policy Commission of the Board of Rectors of Spanish Universities and endorsed by all public and private universities in Spain.

Challenges in Language Testing Around the World Jun 06 2020 This book combines insights from language assessment literacy and critical language testing through critical analyses and research about challenges in language assessment around the world. It investigates problematic practices in language testing which are relevant to language test users such as language program directors, testing centers, and language teachers, as well as teachers-in-training in Graduate Diploma and Master of Arts in Applied Linguistics programs. These issues involve aspects of language testing such as test development, test administration, scoring, and interpretation/use of test results. Chapters in this volume discuss insights about language testing policy, testing world languages, developing program-level language tests and tests of specific language skills, and language assessment literacy. In addition, this book identifies two needs in language testing for further examination: the need for collaboration between language test developers, language test users, and language users, and the need to base language tests on real-world language use.
