Synergistic Design of Sustainable Built Environments Dec 26 2021

Synergistic Design of Sustainable Built Environments introduces and illustrates a novel systems approach that fosters both design excellence and a leap toward a more biocentric (ecologically sustainable) design paradigm. The book provides a deeper understanding of the theories and principles of biocentric design and offers detailed descriptions of the synergistic design process of integrating theories and principles into practice. It also presents extensive thermal and visual built environment design strategies, along with qualitative and quantitative information that designers can use to generate feasible solutions in response to varying climate and occupant comfort. Features: Examines the principles and practices of the synergistic design (a fusion of anthropocentric and biocentric) of sustainable built environments and how they relate to practical applications. Presents climatic data and its analysis along with sun-path diagrams for numerous cities to aid in the design of sustainable built environments in multiple regional contexts. Includes numerous case studies of sustainable built environments in varying climatic zones. Explains how renewable energy (solar, wind, biomass, geothermal, hydro, fuel cells) can be successfully integrated in the built environment. This forward-thinking and highly illustrated book will be an invaluable reference to all those concerned with sustainable built environments and related architectural issues.

Twelve-year-old Hope lives in White Rock, a town of inventors struggling to recover from World War III. But adventurous Hope is terrible at inventing. She would much rather sneak off to cliff dive into the Bomb's Breath, the deadly band of air that surrounds the town. When bandits invade White Rock to steal its greatest invention—priceless antibiotics—the town is left with a heartbreaking choice: hand over the medicine and die from disease, or die fighting the bandits. Help lies in a neighboring town, but the bandits count everyone fourteen and older each hour. Now Hope and her friends Aaren and Brock are only ones who can escape through the Bomb's Breath. For once, the daring and rebelliousness that usually get Hope into trouble might just save them all. A Texas Library Association's Bluebonnet Award Selection "Eddleman brings a strong sense of atmosphere to this post-apocalyptic coming-of-age piece, and the underlying message—that it's possible to contribute in unexpected ways—is a positive one." —Publishers Weekly

My Inner Sky Apr 17 2021 From New York Times bestselling author Mari Andrew, a collection of essays and illustrations, divided into phases of the sky--twilight, golden hour, night, and dawn--that serves as a loyal companion for life's curveballs A whole, beautiful life is only made possible by the wide spectrum of feelings that exist between joy and sorrow. Sky in the Deep Jul 01 2022 A 2018 Most Anticipated Young Adult book from debut author Adrienne Young, *Sky in the Deep* is part Wonder Woman, part Vikings—and all heart. OND ELDR.

BREATHE FIRE. Raised to be a warrior, seventeen-year-old Eelyn fights alongside her Aska clansmen in an ancient, rivalry against the Riki clan. Her life is brutal but simple: fight and survive. Until the day she sees the impossible on the battlefield—her brother, fighting with the enemy—the brother she watched die five years ago. Faced with her brother's betrayal, she must survive the winter in the mountains with the Riki, in a village where every neighbor is an enemy, every battle scar possibly one she delivered. But when the Riki village is raided by a ruthless clan thought to be a legend, Eelyn is even more desperate to get back to her beloved family. She is given no choice but to trust Fiske, her brother's friend, who sees her as a threat. They must do the impossible: unite the clans to fight together, or risk being slaughtered one by one. Driven by a love for her clan and her growing love for Fiske, Eelyn must confront her own definition of loyalty and family while daring to put her faith in the people she's spent her life hating.

A Month of Summer Apr 05 2020 An ordinary summer brings about an extraordinary change of heart in the first novel in the Blue Sky Hill series from the #1 New York Times bestselling author of *The Book of Lost Friends* and *Before We Were Yours*. Changes aren't in Rebecca Macklin's plans when she receives a long-distance call from the Dallas police. Her aging father has been found repeatedly wandering the city streets alone, and his wife has suffered a serious illness and landed in a nursing home. Despite the demands of the busy LA legal practice Rebecca shares with her husband, she must put aside old resentments and return to her childhood home. When Hanna Beth Parker hears about the arrival of her stepdaughter, Rebecca, who has stayed away for decades, she

knows something is terribly wrong. Suddenly, the last person she'd ever turn to for help is the only one she can count on. But forging a relationship with Rebecca will require awakening old ghosts. In this moving story of separation and forgiveness, two women will unravel the betrayals of the past, examine the yearnings of the heart, and discover the truest meaning of family.

Architects' Data Aug 10 2020 Neufert's *Architects' Data* is an essential reference for the initial design and planning of a building project. It provides, in one concise volume, the core information needed to form the framework for the more detailed design and planning of any building project. Organised largely by building type, it covers the full range of preliminary considerations, and with over 6200 diagrams it provides a mass of data on spatial requirements. Most illustrations are dimensioned and each building type includes plans, sections, site layouts and design details. An extensive bibliography and a detailed set of metric/ imperial conversion tables are included. Since it was first published in Germany in 1936, Ernst Neufert's handbook has been progressively revised and updated through 39 editions and many translations. This fourth English language edition is translated from the 39th German edition, and represents a major new edition for an international, English speaking readership. Reviews of the Previous Edition: "Neufert's *Architects' Data* was the first book I bought when I started my studies in architecture. It was invaluable for me then and it is still a useful aid in my designs." —Cesar Pelli "With this thorough rewrite Neufert has produced yet again an invaluable reference book." —The *Architects' Journal*

Inside Team Sky Aug 22 2021 The inside story of Team Sky's challenge for the 2013 Tour de France. After the victory of Bradley Wiggins and Team Sky in the 2012 Tour de France, the pressure was on the team to repeat their success in 2013. When Wiggins had to pull out of the defence of his yellow jersey, attention moved to Chris Froome, who had finished as runner-up the year before. Could

he bring about back-to-back victories for the UK and for Team Sky? With team principal Sir Dave Brailsford at the helm, the levels of expectation were high. Nothing less than a win would do. Embedded within the team was top sportswriter David Walsh, who had been covering the sport for four decades. The Sunday Times writer had done more than any other journalist to reveal the lies of Lance Armstrong, he has the reputation for exposing the dark secrets that cycling would want to keep hidden. His inside story, from how Team Sky prepared for the Tour de France through to Froome's emphatic victory, is supported by insights from all the key members of the team, and provides a definitive account of a dramatic race that gripped cycling fans around the world.

Interior Urbanism May 19 2021 Vast interior spaces have become ubiquitous in the contemporary city. The soaring atriums and concourses of mega-hotels, shopping malls and transport interchanges define an increasingly normal experience of being 'inside' in a city. Yet such spaces are also subject to intense criticism and claims that they can destroy the quality of a city's authentic life 'on the outside'. Interior Urbanism explores the roots of this contemporary tension between inside and outside, identifying and analysing the concept of interior urbanism and tracing its history back to the works of John Portman and Associates in 1960s and 70s America. Portman – increasingly recognised as an influential yet understudied figure – was responsible for projects such as Peachtree Center in Atlanta and the Los Angeles Bonaventure Hotel, developments that employed vast internal atriums to define a world of possibilities not just for hotels and commercial spaces, but for the

future of the American downtown amid the upheavals of the 1960s and 70s. The book analyses Portman's architecture in order to reconsider major contexts of debate in architecture and urbanism in this period, including the massive expansion of a commercial imperative in architecture, shifts in the governance and development of cities amid social and economic instability, the rise of postmodernism and critical urban studies, and the defence of the street and public space amid the continual upheavals of urban development. In this way the book reconsiders the American city at a crucial time in its development, identifying lessons for how we consider the forces at work, and the spaces produced, in cities in the present.

Project STAR Oct 24 2021 The Universe in Your Hands Project STAR (Science Teaching through its Astronomical Roots) is an astronomy course that also teaches real-world math and physics. Project STAR capitalizes on students' inherent interest in the limitless universe that surrounds them. This second edition uses a new approach that is consistent with the philosophy of the authors: students learn science better by making measurements and observations than by memorizing "facts." Each chapter begins with questions to test preheld views on certain subjects. Students then use measurements and observations to explore the models in the chapters. Questions are sprinkled throughout the book to test understanding along with cartoons to lighten the learning with humor. Hands-on activities play an essential role in this 1-year course. In completing these hands-on activities, students will: make observations of the skies build models use models to explain observations and make predictions find everyday applications for such models The Student Text for Project STAR, Second Edition

includes updated information, is easier to use and visually more appealing. The material is laid out with new illustrations for greater clarity and understanding. A color plate section supports activities and text related to the study of spectra. A reference section has also been added. It lists astronomy resources on the web. The Astronomy Explorer CD-ROM is included with the Student Text. This interactive CD-ROM contains movies and animations related to astronomy. The student exercises provide an excellent foundation for understanding the complexities of the universe. A glossary of terms is also part of the CD.

City of the Falling Sky (the Seckry Sequence Book 1) Apr 29 2022
When Seckry Sevenstars is forced out of his village by the greedy Endrin Corporation and relocated to the daunting metropolis of Skyfall City, he harbours resentment for the company and vows to get them back one day for taking away his home, his school and his friends. Fortunately, the marvels of the city do a good job in distracting Seckry from his anger and homesickness, and it isn't long before he's competing at Friction (the city's most popular multiplayer video game), slurping awe-inspiring multicoloured milkshakes, and getting butterflies on his first date. Then, when a mysterious email asks Seckry to break into the headquarters of the Endrin Corporation and steal a container full of worms for a hefty sum of money, his anger resurfaces, and he can't resist the revenge he promised himself. Alone at night, Seckry creeps through the sewers whilst wondering what experiments Endrin might be doing on the worms, and emerges into the silent complex. But the worms aren't the only thing that he finds. Staring at him through the darkness, with wide, innocent eyes, is something that makes Seckry's heart almost stop. A girl. She's shaking, petrified, and has no recollection of who she is or what she's doing there. Floodlights bleach the area and Seckry has no choice but to grab a hold of the

girl and escape with her. Suddenly the question of what Endrin were doing with a few worms becomes the last thing on Seckry's mind. What were Endrin doing with a human?

Corporate Imaginations Feb 02 2020 The first extended study of the renowned artists' collective Fluxus, *Corporate Imaginations* examines the group as it emerged on three continents from 1962 to 1978 in its complexities, contradictions, and historical specificity. The collective's founder, George Maciunas, organized Fluxus like a multinational corporation, simulating corporate organization and commodity flows, yet it is equally significant that he imagined critical art practice in this way at that time. For all its avant-garde criticality, Fluxus also ambivalently shared aspects of the rising corporate culture of the day. In this book, Mari Dumett addresses the "business" of Fluxus and explores the larger discursive issues of organization, mediatization, routinization, automation, commoditization, and systematization that Fluxus artists both manipulated and exposed. A study of six central figures in the group—George Brecht, Alison Knowles, George Maciunas, Nam June Paik, Mieko Shiomi, and Robert Watts—reveals how they developed historically specific strategies of mimicking the capitalist system. These artists appropriated tools, occupied spaces, revealed operations, and, ultimately, "performed the system" itself via aesthetics of organization, communication, events, branding, routine, and global mapping. Through "corporate imaginations," Fluxus artists proposed "strategies for living" as conscious creative subjects within a totalizing and increasingly global system, demonstrating how these strategies must be repeated in an ongoing negotiation of new relations of power and control between subject and system.

Put The Sky Inside Of You Oct 04 2022 Set in Czech Republic and

Slovakia, this book follows the stories behind the lives of Julo, Jirka and Jozef. Jirka and Jozef met Julo during their mandatory military service. “Put the Sky Inside of You” describes how life events might change a person’s inner world and how the inner world can transform itself to chaos and confusion, which could lead to a tragedy. This book also suggests how the inner world can be transformed back to normality. “There is a way to get out of almost every situation if cognitive system is at least little bit alive,” the author tells.

Turn Left at Orion Nov 12 2020 With over 100,000 copies sold since first publication, this is one of the most popular astronomy books of all time. It is a unique guidebook to the night sky, providing all the information you need to observe a whole host of celestial objects. With a new spiral binding, this edition is even easier to use outdoors at the telescope and is the ideal beginner's book. Keeping its distinct one-object-per-spread format, this edition is also designed for Dobsonian telescopes, as well as for smaller reflectors and refractors, and covers Southern hemisphere objects in more detail. Large-format eyepiece views, positioned side-by-side, show objects exactly as they are seen through a telescope, and with improved directions, updated tables of astronomical information and an expanded night-by-night Moon section, it has never been easier to explore the night sky on your own. Many additional resources are available on the accompanying website,

A Crack in the Sky May 31 2022 Thirteen-year-old Eli Papadapoulous is worried. Even though he's part of in the most powerful family in the world. Even though his grandfather founded InfiniCorp, the massive corporation that runs everything in the bustling dome-cities. Even though InfiniCorp ads and billboards are plastered everywhere, proclaiming: DON'T WORRY! INFINICORP IS TAKING CARE OF EVERYTHING! Recently, Eli noticed there's something wrong with the artificial sky. It keeps shorting out, displaying strange colors and random, pixellated images. And though the Department of Cool and Comfortable Air is working overtime, the dome-city is hotter than it's ever been. Eli has been raised to believe that the dome-cities are safe and comfortable; that the important thing is to keep working, keep consuming; that InfiniCorp knows better than he, and he should leave everything in their hands. But now he begins asking questions.

Deceiving the Sky Aug 02 2022 The United States' approach to China since the Communist regime in Beijing began the period of reform and opening in the 1980s was based on a promise that trade and engagement with China would result in a peaceful, democratic state. Forty years later the hope of producing a benign People's Republic of China utterly failed. The Communist Party of China deceived the West into believing that the its system and the Party-ruled People's Liberation Army were peaceful and posed no threat. In fact, these misguided policies produced the emergence of a 21st Century Evil Empire even more dangerous than a Cold War version in the Soviet Union. Successive American presidential administrations were fooled by ill-advised pro-China policymakers, intelligence analysts and business leaders who facilitated the rise not of a peaceful China but a threatening and expansionist nuclear-armed communist dictatorship not focused on a single overriding strategic objective: Weakening and destroying the United States of America. Defeating the United States is the first step for China's

current rulers in achieving global supremacy under a new world order based on an ideology of Communism with Chinese characteristics. The process included technology theft of American companies that took place on a massive scale through cyber theft and unfair trade practices. The losses directly supported in the largest and most significant buildup of the Chinese military that now directly threatens American and allied interests around the world. The military threat is only half the danger as China aggressively pursues regional and international control using a variety of non-military forces, including economic, cyber and space warfare and large-scale influence operations. *Deceiving the Sky: Inside Communist China's Drive for Global Supremacy* details the failure to understand the nature and activities of the dangers posed by China and what the United States can do in taking needed steps to counter the threats.

Hopeless Aug 29 2019 From the #1 New York Times bestselling author of *It Ends With Us* comes the beginning of *Sky and Dean's* passionate love story – where well-kept secrets threaten to open wounds of a dark past. Would you rather know a truth that makes you feel hopeless, or keep believing the lies? Beloved and bestselling author Colleen Hoover returns with the spellbinding story of two young people with devastating pasts who embark on a passionate, intriguing journey to discover the lessons of life, love, trust – and above all, the healing power that only truth can bring. Sky, a senior in high school, meets Dean Holder, a guy with a promiscuous reputation that rivals her own. From their very first encounter, he terrifies and captivates her. Something about him sparks memories of her deeply troubled past, a time she's tried so hard to bury. Though Sky is determined to stay far away from him, his unwavering pursuit and enigmatic smile break down her defenses and the intensity of the bond between them grows. But the mysterious Holder has been keeping secrets of his own, and once they are revealed, Sky is changed forever and her ability to trust

may be a casualty of the truth. Only by courageously facing the stark revelations can Sky and Holder hope to heal their emotional scars and find a way to live and love without boundaries. Hopeless is a novel that will leave you breathless, entranced, and remembering your own first love.

The Sky Inside Nov 05 2022 Martin lives in a perfect world. Every year a new generation of genetically-engineered children is shipped out to meet their parents. Every spring the residents of his town take down the snow they've stuck to their windows and put up flowers. Every morning his family gathers around their television and votes, like everyone else, for whatever matter of national importance the president has on the table. Today, it is the color of his drapes. It's business as usual under the protective dome of suburb HM1. And it's all about to come crashing down. Because a stranger has come to take away all the little children, including Martin's sister, Cassie, and no one wants to talk about where she has gone. The way Martin sees it, he has a choice. He can remain in the dubious safety of HM1, with danger that no one wants to talk about lurking just beneath the surface, or he can actually break out of the suburb, into the mysterious land outside, rumored to be nothing but blowing sand for miles upon miles. Acclaimed author Clare B. Dunkle has crafted a fresh and fast-paced science-fiction thriller, one that challenges her characters -- and her readers -- to look closer at the world they take for granted.

Ofrenda Dec 14 2020 Liliana Wilson's art of resistance and protest, dissidence and dreams, consistently calls attention to injustice. Wilson belongs to a group of Chilean artists who were intimately shaped by the political turmoil and repression in Chile in the 1970s and 1980s and who have become self-exiled artists working outside of Chile but who are still tied to the political period and to its issues and concerns. From a working class family that struggled financially, Wilson nonetheless was able to study law, which facilitated her successful immigration to the United States in 1977.

She moved to Texas and in Austin found a cultural oasis that permitted her art to blossom. Now, after some thirty years of artistic work in Texas, she is recognized as a major Latina artist, whose influence extends beyond US borders. A crusader for justice and against oppression, she paints and draws in various media and has become an inspiration for younger artists concerned with not only political repression and inequality but also individual fear and despair. *Ofrenda: Liliana Wilson's Art of Dissidence and Dreams* highlights some of Wilson's most representative works, accompanied by biographical background and scholarly interpretation.

Black Sun Mar 29 2022 NOMINATED FOR THE 2021 HUGO AWARDS AND THE 2020 NEBULA AWARDS FOR BEST NOVEL From the New York Times bestselling author of *Star Wars: Resistance* *Reborn* comes the first book in the *Between Earth and Sky* trilogy, inspired by the civilizations of the Pre-Columbian Americas and woven into a tale of celestial prophecies, political intrigue, and forbidden magic. A god will return When the earth and

sky converge Under the black sun In the holy city of Tova, the winter solstice is usually a time for celebration and renewal, but this year it coincides with a solar eclipse, a rare celestial event proscribed by the Sun Priest as an unbalancing of the world. Meanwhile, a ship launches from a distant city bound for Tova and set to arrive on the solstice. The captain of the ship, Xiala, is a disgraced Teek whose song can calm the waters around her as easily as it can warp a man's mind. Her ship carries one passenger. Described as harmless, the passenger, Serapio, is a young man, blind, scarred, and cloaked in destiny. As Xiala well knows, when a man is described as harmless, he usually ends up being a villain. Crafted with unforgettable characters, Rebecca Roanhorse has created an epic adventure exploring the decadence of power amidst the weight of history and the struggle of individuals swimming against the confines of society and their broken pasts in the most original series debut of the decade.

Incident at Big Sky Jun 27 2019 Edgar Award Finalist: The “exciting” true story of the abduction of biathlete Kari Swenson and the five-month manhunt to bring her tormentors to justice (The New York Times Book Review). Former rodeo cowboy Johnny France had been sheriff of Madison County, Montana, for three years when Kari Swenson, a Bozeman resident training for the World Biathlon Championship, went missing near Big Sky Resort in July 1984. Her friends feared that Kari had been attacked by a grizzly bear, but the truth was far scarier: She’d been kidnapped at gunpoint by father-and-son survivalists Don and Dan Nichols. The pair had been living in the wilderness off and on for years and hoped to make Kari a “mountain woman” and Dan’s bride. But the plan went horribly wrong from the start, and after a deadly firefight with rescuers, the kidnappers vanished into the rugged terrain of the Spanish Peaks. As Montana’s summer froze into brutal winter blizzards, SWAT teams, forest rangers, and antiterrorist units searched the backcountry but sighted the mountain men only once. Then came the call about a strange campfire on a slope above the Madison River. Sheriff France decided to go into the forest to face the fugitives—alone. The resulting showdown made him “perhaps the most famous Western sheriff since Wyatt Earp . . . a modern legend” (Chicago Tribune). Incident at Big Sky is an “amazing . . . exciting retelling of a modern crime” that made headlines around the world (The New York Times Book Review). In a voice as distinctive and compelling as the Montana landscape, France takes readers on a high-stakes

adventure so bizarre and unforgettable it could only be true.

Mario and the Hole in the Sky May 07 2020 The true story of how a scientist saved the planet from environmental disaster. Mexican American Mario Molina is a modern-day hero who helped solve the ozone crisis of the 1980s. Growing up in Mexico City, Mario was a curious boy who studied hidden worlds through a microscope. As a young man in California, he discovered that CFCs, used in millions of refrigerators and spray cans, were tearing a hole in the earth's protective ozone layer. Mario knew the world had to be warned--and quickly. Today Mario is a Nobel laureate and a recipient of the Presidential Medal of Freedom. His inspiring story gives hope in the fight against global warming.

High Line Sep 10 2020 How two New Yorkers led the transformation of a derelict elevated railway into a grand--and beloved--open space The High Line, a new park atop an elevated rail structure on Manhattan's West Side, is among the most innovative urban reclamation projects in memory. The story of how it came to be is a remarkable one: two young citizens with no prior experience in planning and development collaborated with their neighbors, elected officials, artists, local business owners, and leaders of burgeoning movements in horticulture and landscape architecture to create a park celebrated worldwide as a model for creatively designed, socially vibrant, ecologically sound public space. Joshua David and Robert Hammond met in 1999 at a community board meeting to consider the fate of the High Line. Built in the 1930s, it carried freight trains to the West Side when the area was defined by factories and warehouses. But when trains were replaced by truck transport, the High Line became obsolete. By century's end it was a rusty, forbidding ruin. Plants grew between the tracks, giving it a wild and striking beauty. David and Hammond loved the ruin and saw in it an opportunity to create a new way to experience their city. Over ten years, they did so. In this candid and

inspiring book-- lavishly illustrated--they tell how they relied on skill, luck, and good timing: a crucial court ruling, an inspiring design contest, the enthusiasm of Mayor Bloomberg, the concern for urban planning issues following 9/11. Now the High Line--a half-mile expanse of plants, paths, staircases, and framed vistas--runs through a transformed West Side and reminds us that extraordinary things are possible when creative people work together for the common good.

Serpent in the Sky Mar 05 2020 John Anthony West's revolutionary reinterpretation of the civilization of Egypt challenges all that has been accepted as dogma concerning Ancient Egypt. In this pioneering study West documents that: Hieroglyphs carry hermetic messages that convey the subtler realities of the Sacred Science of the Pharaohs. Egyptian science, medicine, mathematics, and astronomy were more sophisticated than most modern Egyptologists acknowledge. Egyptian knowledge of the universe was a legacy from a highly sophisticated civilization that flourished thousands of years ago. The great Sphinx represents geological proof that such a civilization existed. This revised edition includes a new introduction linking Egyptian spiritual science with the perennial wisdom tradition and an appendix updating West's work in redating the Sphinx. Illustrated with over 140 photographs and line drawings.
